en Osteosynthesis compressive staple

novastep° S.A.S

Manufactured for:

2, Allée Jacques Frimot 35000 Rennes - France Tel. : +33 (0)2.99 33 86 50 Fax : +33 (0)9.70.29.18.95 Extremity Medical, LLC. 300 Interpace Parkway, Building A 2nd Floor Parsippany, NJ 07054 +1 (973) 588-8980

en <u>PRESENTATION</u>

Each (double-wrapped) pack contains a ready-to-use sterile implant with foam holder.

Gamma sterilisation.

COMPOSITION

NiTinol alloy | ASTM-F2063.

TARGET GROUP(S)

Target population

Adult patients.

Intended user

Orthopaedic surgeons

CAUTION: American federal laws require this device to be supplied by a physician or in accordance with a medical practitioner's prescription.

INDICATIONS FOR USE

eXpress[®] compressive staples are indicated for Hand and foot bone fragments osteotomy fixation and joint arthrodesis.

CONTRA-INDICATIONS

• Severe muscular, neurological or vascular deficiency in the extremity concerned.

• Bone destruction or poor bone quality, likely to impair implant stability.

• Hypersensitivity to NiTinol.

DIRECTIONS FOR USE

<u>CAUTION</u>: It is at the discretion of the practitioner to choose the product according to the patient's clinical condition and current chirurgical practices.

<u>CAUTION</u>: the implant is supplied sterile and must be used in a sterile environment only to avoid contamination risk.

Select the appropriate device for the indication.

• Before use, check the condition of the packaging. If the packaging is damaged, do not use the staple and dispose of it according to the disposal section.

• Implant the device using conventional technique.

<u>CAUTION:</u> eXpress[®] is only compatible with the surgical instruments supplied by eXtremity Medical and manufactured by Novastep, do not use other instruments from other manufacturers.

Removal procedure

In case of complications and at the discretion of the surgeon, the implant can be removed using conventional removal techniques.

WARNINGS AND PRECAUTIONS

Precautions for use

• Risk of interference with medical imaging: MRI/CT scan: the patient should be instructed to systematically declare if he has undergone a surgical procedure.

• The safety and use of the device has not been assessed in a magnetic resonance (MR) environment.

• Heating or migration of the device has not been tested in a magnetic resonance (MR) environment.

Warnings

• The device is not designed to withstand an immediate load after surgery and does not allow for immediate resumption of the patient's activities. If necessary, immobilise during osteosynthesis.

• Device is intended for single use, do not reuse the device to avoid cross contamination.

Do not re-sterilize the device.

SIDE EFFECTS

- Pseudoarthrosis.
- Infection, bruising, venous thrombosis, pulmonary embolism, cardiovascular problems.
- Hypersensitivity to one of the components of eXpress[®].

Please report any serious incident that occurred in relation to the device to Novastep (regulatory@novastep-ortho.com) and to the local competent authority for medical devices.

STORAGE CONDITIONS

Store in a dry place at ambient temperature.

DISPOSAL

The explanted osteosynthesis compressive staple is in direct contact with biological tissue and should be disposed of in a biohazardous waste bin according to hospital protocol.

There are no recommendations for the disposal of packaging or an unused staple. Refer to the applicable laws for product recycling.
