

# OMNI™ Lapidus Plating System

EXTREMITY  
MEDICAL

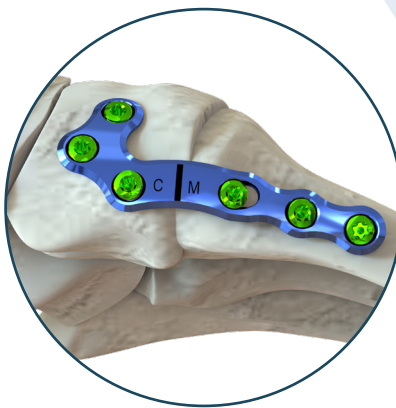

- Contoured to fit the 1<sup>st</sup> TMT joint and avoid anatomical structures
  - Accepts locking and non-locking screws
    - Low profile = **1.3mm** thickness
    - Features **SlotLock** technology

Lapidus SlotLock Plate  
Slim, 4-Hole

Lapidus SlotLock Plate  
6-Hole (L/R)

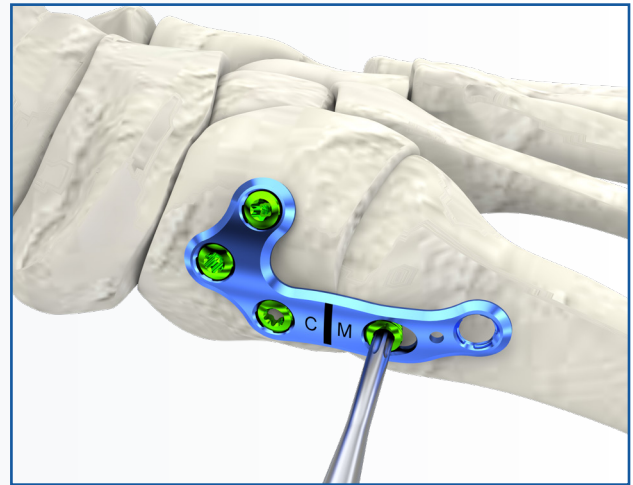

Lapidus SlotLock Plate  
Straight, 4-Hole

featuring

# SlotLock<sup>®</sup>

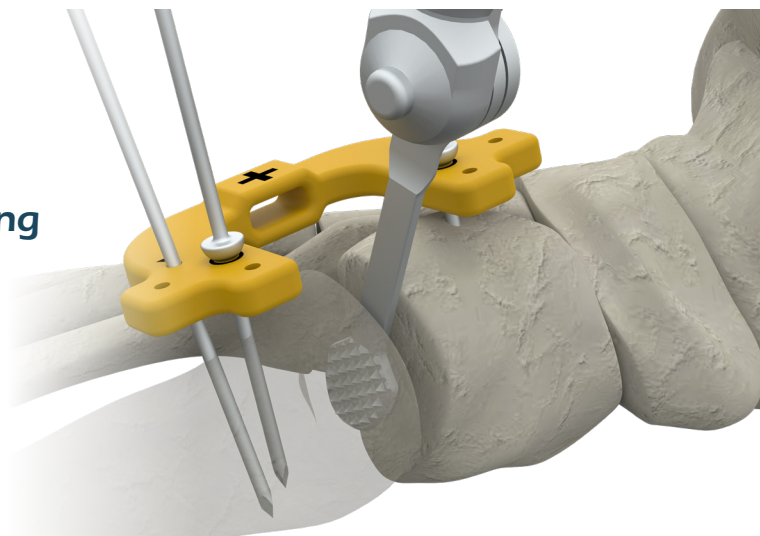

A novel locking compression slot that affords the surgeon greater versatility with reliable fixed angle compression capability

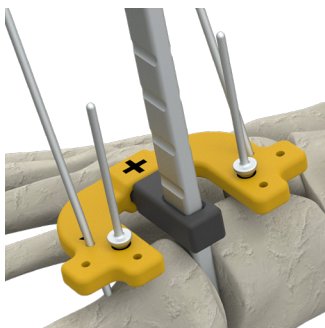

**306%** increase in Peak Compression and **542%** increase in Sustained Compression vs. a Standard Compression Slot\*

## Advanced Joint Preparation and Alignment Instrumentation

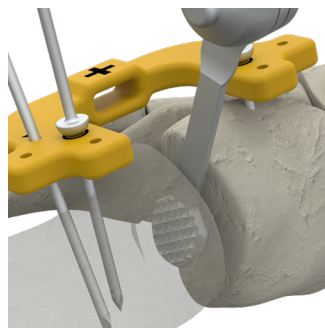

- ✓ The Cartilaginator is designed to remove cartilage while minimizing 1<sup>st</sup> TMT shortening
- ✓ Low profile reduction clamp for 3D correction
- ✓ Distraction instruments for a minimal incision approach
- ✓ Designed to allow faster and more precise joint preparation
